Label:	MANDATORY		
Domain:			
Type:	Char		
Length:	2	Precision:	0
Null Values:	0%	Distinct Values:	100%
		Average Length:	1

Description The number of arrests in the 30 days preceding the date of admission or discharge to or from treatment. This item is intended to capture the number of times the client was arrested for any cause during the 30 days preceding the date of admission and or discharge to/from treatment. Any formal arrest is to be counted regardless of whether incarceration or conviction resulted and regardless of the status of the arrest proceedings at the time of admission. **It should be noted that this data field is primarily collected for Substance Abuse and Mental Health clients. Developmental Disability clients should be coded as a 98. Additionally, a threshold level of at least 90% of something other than unknown (97) will be monitored through the Performance Contract.**

00-96 Number of Arrests

97 Unknown

98 Not Applicable, Developmental Disability Target Population/Principal Diagnosis

.

Annotation New data field effective 05/01/08. This data field was added as a requirement of Federal Substance Abuse Block Grant reporting.

attn_self_help, column **NEW**

Table Code:	CDW_DICTIONARY		
Name:	attn_self_help		
Code:	attn_self_help		
Label:	MANDATORY		
Domain:			
Type:	Char		
Length:	2	Precision:	0
Null Values:	0%	Distinct Values:	100%
		Average Length:	1

Description The number of times the client has attended a self-help program in the 30 days preceding the date of admission/discharge from treatment services. Included attendance at AA, NA, and other self-help/mutual support groups focused on recovery from substance abuse and dependence. **It should be noted that this data field is primarily collected for Substance Abuse and Mental Health clients. Developmental Disability clients should be coded as a 98. Additionally, a threshold level of at least 90% of something other than unknown (97) will be monitored through the Performance Contract.**

Valid entries: 01 **No attendance in the past month**
 02 **1-3 times in past month** (less than once per week)
 03 **4-7 times in past month** (about once per week)
 04 **8-15 times in past month** (2 or 3 times per week)
 05 **16-30 times in past month** (4 or more times per week)
 06 **Some attendance, but frequency unknown**

 97 **Unknown**
 98 **Not Collected**

Unknown (97) Use this code if the State collects these data, but for some reason this record does not reflect an acceptable value.

Not Collected (98) Use this code if the State does not collect these data for submission to TEDS.

Any other entry sets the field to **Invalid (99)** during processing.

Guidelines: Use **Code 06** (frequency unknown) only if it is unknown that the client attended a self-help program during the month prior to admission/discharge, but there is insufficient information to record one of the specific frequency categories. Use **Code 97** (unknown) when it is not known whether the client attended a self-help program during the month prior to admission/discharge.

This item is intended to capture the frequency with which the client attended self-help groups during the 30 days preceding admission or discharge from treatment. In the event treatment was initiated less than 30 days prior to discharge, this item refers to the frequency of attendance since the treatment was initiated.

Use number of times attended self-help programs, not number of days, i.e., if a client attends self-help programs multiple times per day, let the number of times rather than the approximate times per week determine the response category. If the number exceeds 30 times in the prior 30 days, use the response category 16-30 times.

Description

CDW link to external data systems, this field can contain:

Unique-Id additional identifying information to link data records
 SSN,
 DLN (Drivers License number),
 Medicaid,
 Medicare
 Client #.

The data is to be encrypted.

Annotation

Data migration note :

Client #	no edits,	
DLN	no edits,	
Medicaid #	no edits,	
Medicare #	no edits,	
SSN	9 bytes numeric,	
Unique id	1st three characters of last name	+
	1st character of 1st name	+
	6 character birth date,	+
	id if more than one record.	

Willie M, Thomas S and Client Unique-Id are the same values and only Unique-Id will be defined. In the case of an area program use client record as a search value. In the case of an institution use the client medical record number.

Description Axis codes refer to different classes of information as defined by DSM or ICD, including clinical syndromes, developmental and personality disorders, and physical disorders and conditions. Axis 1-3 are common diagnosis values and 4 is problem classifications.

Axis I = 1,
 Axis II = 2,
 Axis III = 3,
 Axis IV = 4.

This is a one character alphanumeric field, no special characters allowed.

Diagnosis/axis specs for institution/CDW diagnosis crosswalk:

When we get diagnoses from the HEARTS system, this is how to generate an axis code and determine their group.

1. Any code in-group 1 is Axis 1 and DSM
2. Any code in-group 2 is Axis 2 and DSM
3. Codes in-group 3 are exception codes (there are about 10 of them) - each individual code has a special rule. TBD by user).
4. Codes in-group 4 are outside the DSM4 range - THESE MAY BE OBSOLETE, TBD
5. All other codes are Axis 3 - ICD9 codes.

Annotation

Data migration :

If the axis is blank, indicating old data, set the axis indicator to 1.

If the axis code is 1,2,3 move source code to target.

If the axis is 4 or 5 then don't write a CDW diagnosis record.

Post migration :

If axis code is not in the 'axis code' table reject record,
 else move valid value to target.

Institutions:

Based on diagnosis code,

if code w/i set 1 then axis I,

if code w/i set 2 then axis II,

if code w/i set 3 then axis III,

if code w/i set 4 then axis I or II.

Description

A code describing the condition established after screening and assessment, to be chiefly responsible for occasioning the admission of a client. The code is used for both area programs and institutions. It is alphanumeric and cannot contain special characters. Effective 07/01/2004 the coding scheme changed from DMS-IV to ICD-9 for Area Program clients. ICD-9 has been in use at the institutions for some time.

Description

This field is derived from a combination of the diagnosis code, axis code, and diagnosis version.

Internal Use only.

Annotation

Data migration note : If the client status is 'A' for active and the discharge date is greater than Jan 1, 1997 or the admission date is greater than Jan 1, 1997, than use the DSM4 codes to determine diagnostic groupings. Else move the diagnostic code from the diagnostic segment and move a blank to the diagnostic group field.

Below are the date ranges, which will determine which DSM code, set to use based on the fiscal year.
